Full Stack Software Developer with hands-on experience building and deploying scalable web applications using the MERN stack. Skilled in secure REST APIs, JWT authentication, role-based access control, and responsive UI development. Strong in JavaScript, backend architecture, and performance-focused engineering.

Projects

Employee Management System

Built a full-stack employee management system to manage users, tasks, and roles with secure authentication and authorization.

Implemented JWT-based authentication with role-based access control (Admin/Employee)

Developed secure REST APIs for management

Designed responsive UI using React

Followed clean backend code practices

AI Image Enhancer

Developed an AI-powered image enhancement platform that allows users to upload and enhance images using third-party AI APIs.

Integrated AI image processing APIs

Built secure backend with JWT authentication

Handled image uploads, API requests, and response processing

Deployed and tested production-ready full-stack application

Developer Portfolio Website

Designed and developed a personal developer portfolio to showcase full-stack projects, technical skills, and live deployments.

Built fully responsive UI optimized for mobile and desktop

Implemented smooth animations and section-based navigation

Integrated live project demos and GitHub links

Deployed using Vercel

Core Skills

Programming Languages:
